

Mercury Glass Gazing Ball Instructions

Illuminated from within, these reflective metallic gazing balls offer a glamorous lighting solution. Each is a beautiful décor accent during the daylight hours and becomes an ambient glowing globe in the dark. They are perfect for display indoors or in covered outdoor areas and are battery operated for easy portability.

1. Requires 3 AA batteries
2. To install or replace the batteries: Open the battery box by removing the black silicone cover at the base of the gazing ball, carefully remove the plastic cover by pressing the end clip in and pulling up on the cover.
3. Install only new batteries of the same type, i.e. alkaline, heavy duty, etc. Do not mix battery type or old and new batteries together.
4. Insert the batteries in the correct polarity as per the markings in the battery box.
5. Failure to insert batteries in the correct polarity may shorten the life of the batteries or cause batteries to leak.
6. Slide the lever next to the battery cavity to either ON or TIMER. Set the unit on TIMER when you want it to come on (generally at dusk) and it will remain on for 6 hours and off for 18 and then automatically turn back on for 6 hours.
7. Replace the battery cover by clipping it back in place and then replace the water resistant silicone cover.
8. The battery box is weather resistant and intended for both indoor and outdoor use

NEVER DISPOSE OF BATTERIES IN A FIRE. PLEASE RECYCLE OR DISPOSE OF BATTERIES PROPERLY PER YOUR LOCAL OR STATE GUIDELINES
