

# Sheesham Wood Care Card

We hope you enjoy your new sheesham wood design. Sheesham wood is known for its durability, defined grain, and natural resistance to deterioration. Unlike standard board furniture, sheesham wood features intricate natural grain patterns that vary from piece to piece, which makes them uniquely beautiful as a result.

## CARE INSTRUCTIONS

By following these easy care instructions, you can keep your sheesham wood furniture and décor looking new for years to come. Wood furniture and decor will last for generations with proper care.

### Light & Heat

Always protect your sheesham wood furniture and décor from direct sunlight and exposure to temperature variations. The color may fade if exposed to direct heat and sunlight. Additionally, place wood items at a safe distance from heat sources including fireplaces and heat radiators to prevent warping.

### Humidity

Sheesham wood furniture and/or décor should not be exposed to extreme humidity changes. Moisture may cause the wood to expand and contract, which can result in cracking.

### Liquids

In order to prevent staining and warping of your beautiful sheesham wood furniture, always use mats and coasters when placing any food or beverage item on the furniture. Do not place any hot item on the furniture directly. If liquid spills over it, immediately wipe it with a sponge or towel.

### Chemicals

Alcohol, deodorants and perfumes should not be used near sheesham wood furniture and/or décor as some chemicals in these types of products may harm the finish of the wood.

Care instructions continued on the back →

## Cleaning & Polish

Dust regularly using a slightly moistened cotton or microfiber dusting cloth. Polish occasionally with any wood safe polish available through your local grocery or variety store to restore the wood's shine.

Do not use excess water to clean your sheesham wood furniture and/or décor. Only a few drops can clean the furniture. Excess water that is allowed to sit or puddle can leave stains and cause wood to swell or warp.

To get a premium finish and a beautiful luster on your sheesham wood furniture and/or décor, apply a natural beeswax polish. Use a dry cloth and buff ensuring any excess wax is removed. Please follow the instructions provided with your beeswax product.

## OUR VALUES

---

### GLOBAL CITIZEN

Fair trade practices, artisan-made

### SMALL FOOTPRINT, BIG IMPACT

Uses reclaimed or recycled material

### ALL NATURAL

Products without chemicals

### HOME GROWN

Made in the USA

VivaTerra is a retailer with a heart and a vision for both globally-inspired modern design and goods created with sustainability and integrity in mind. We value the expertise and talent of artisans around the world, and the craftsmanship exhibited in their work. We strive to share this contemporary, artisan-crafted aesthetic with our consumers through unique and earth-friendly goods.

We believe that ethical and sustainable conduct should be prioritized—not sacrificed—in an effort to achieve our goals. We are always concerned with the who, what, where and how surrounding our products. Our hope is that each piece created exemplifies social consciousness, global inspiration, quality workmanship, and one-of-a-kind style.
