VIVATERRA Care Instructions:

Succulent Ornament

Whether hung on a holiday tree or elsewhere, these diverse succulents are great conversation pieces. We gave these cacti-family members a chance to show their stuff in the dead of winter, and they responded splendidly. They last for many weeks as living ornaments, and then can be planted in soil to enjoy for years to come.

Care Instructions:

Light: Hang your ornament near bright filtered light.

Water/Care: Remove your succulent from the hanger and remove any dry leaves. Plant in a 4" pot with cactus mix and water thoroughly. Allow the soil to completely dry between watering.
